HB 195: Requiring addresses on driver's licenses
Introduced by M. Rosendale

I don't have a problem with requiring a residence address on a driver's license, but would request an amendment be included as this bill moves forward.

If this bill passes and changes are made to the license format, an indication of US citizenship should be included as well.

Since a legal alien may obtain a Montana driver's license and that license is used for proof of residency when applying for hunting licenses, voter registration, and possibly other purposes, having a simple Yes/No indication of US citizenship on this form of ID would expedite some application procedures.

Thank you,

Cindy Swank
